Health Outreach Programs

Cyprus International University provides lots of free educational programs, events, and seminars to the community in the context of Good Health and Well Being. Most of our events are advertised in the events tab on our university website: <https://www.ciu.edu.tr/en/events>, where some of these events are organized in collaboration with the government or NGOs.

While some of these events cover topics like disabilities, the university also provides support to students with disabilities **(see appendix 1)**

Some of the Health-related events can be seen below as well.

A project titled "Witnesses of the Transformation from Rural to Urban: Migrant Women/A Socio-cultural Change Analysis" was initiated by the Cyprus International University Women and Gender Studies Center (WGSRC).

WGSRC Director and project manager Assist. Prof. Dr. Mıhrıcan Aylanç made a statement about the purpose of the study which aims to identify the women who settled/ were forced to settle in Göçmenköy due to forced internal migration in Nicosia. The personal migration stories of these women will be recorded which will help to determine how and in what way the migrations affected women's lives, their adaptation to the new life and changes in Göçmenköy. She also stated that women's personal histories and the unforgettable moments will be investigated, as well as the adaptation processes and how urbanization affected these women will be investigated.

For more details: <https://www.ciu.edu.tr/en/news/transformation-rural-urban>

Appendix 1:

Services Provided for Students with Disabilities Between 2018-2022

Disabled Student Unit; Based on the principle of equal opportunity in education, services are provided in order to ensure that students with disabilities can benefit from all services and opportunities during their education and to facilitate their access to these services. For this purpose, it works to eliminate the restriction of movement in and around the campus, to make administrative plans to eliminate the restrictions in access to education programs due to disabilities, and to provide a right and law-based approach, especially in assessment and evaluation, which is an important part of student life.

Two psychologists, assigned by the Rectorate, work as consultants for the

disabled. Services Performed:

- The buses used to access the university have been renewed and the buses that will provide access to the disabled have been added to the transportation fleet.
- Building areas were arranged, and ramp access to campus buildings was arranged.
- Education and activity areas have been rearranged so that students with disabilities do not experience difficulties in accessing classes and activities in buildings with unsuitable access.
- All buildings above a single floor have an elevator.
- Parking spaces have been rearranged, and disabled parking spaces have been marked.
- Signs of all rooms and classrooms on campus for visually impaired students are marked with Braille, increasing the mobility of students on campus.
- Braille Tablets were purchased for students with visual impairments to facilitate their education.
- Institutional cooperation with Boğaziçi University's Technology Laboratory for the Visually Impaired (GETEM) was established so that visually impaired students can benefit from the Library, and visually impaired personnel and students benefit from library services. Our visually impaired students can access more than 15 thousand publications in our library.
- Disabled students can also get support from PDAREM, affiliated with the ÖGDM Directorate, for their psychological problems.
