Collaborations on Developing Best Practices for Tackling the SDGs

Cyprus International University works closely with institutions and international bodies to achieve its sustainability goals, develop and improve its SDG practices, and contribute to global best practices. We ensure that our SDG practices improve in time through continuous measurement, meetings, and monitoring.

One example is the UI GreenMetric, an initiative developed by the University of Indonesia in 2010. This initiative aims to provide the result of an online survey regarding the current condition and policies related to Green Campuses and Sustainability in Universities worldwide. It is expected that by drawing the attention of university leaders and stakeholders, more attention will be given to combating global climate change, energy and water conservation, waste recycling, and green transportation. Such activities will require a modification of behavior and providing more attention to the sustainability of the environment and economic and social problems related to sustainability.

Prof. Serkan is closely working with UI Greenmetrics to improve SDG best practices. Further details can be obtained through the following link:

<https://www.ciu.edu.tr/en/news/ciu-ranking-69th-international-greenmetric-2023>

By developing and adopting best practices for achieving the SDGs, CIU gradually increased its rank as the 69th sustainable campus out of 1183 institutions in 2023.
